

GPS Living Memorial

A dignified way to celebrate life.

Memory Book

Collect and share unlimited memories and stories from friends and family.

Online Access

View from the comfort of home and share with your friends and family.

Unlimited Tributes

Ample storage of photos, memories and videos to honor your loved one.

Printed Copies

Print copies of your Living Memorials to share.

GPS Navigation

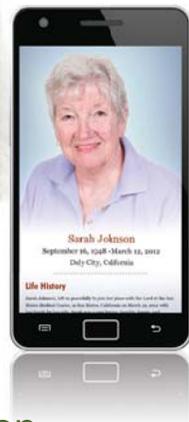

GPS makes finding a specific location and viewing the Living Memorial easy.

Start using Living Memorials as soon as your Pontem Online Burial Search feature is in place for a low monthly fee. Add Pontem's Esri™-engineered mapping option for even more functionality including the ability to add GPS coordinates enabling self-guided cemetery tours and more!

GPS Living Memorial

A dignified way to celebrate life.

Set the Bar for Memorialization - Generate Revenue and Leads

Memorialize the precious memories of your families' loved ones in new and different ways with Living Memorials.

Instead of only a static physical memorial to pay tribute, family members can celebrate the lives of their loved ones through sharing memories, stories, videos and photos right from your cemetery's Pontem Online Burial Search Page!

Visitors to your site can contribute content, view the memorial online, share the link to the page through social media, or print paper copies.

You can choose to charge for this new service, or you can generate leads as friends and family register on your site to share their own contributions.

Living Memorial Set-Up

Set-up of your cemetery's Living Memorial program couldn't be easier!

Seamless integration and synchronization of Pontem's Online Burial Search software with webCemeteries.com's Living Memorials program means digital memorial pages are automatically generated for all your burial records included in your Pontem database.

You needn't do anything more!

Do Even More with GPS!

If you also have Pontem's integrated GIS Mapping option and elect to add on webCemeteries.com's GPS feature, you'll have a world of new possibilities right in your hand.

Your cemetery will have your own special, customized Apple and Android mobile apps that enable users to locate the specific graves of their loved ones or take self-guided walking tours to view the memories, photos and videos memorializing the deceased.

Your grounds and sales staff will also have the ability to use special field office apps that save time and money too.

Complimentary Marketing Support

Upon set-up, you'll receive a special how-to press kit to help promote your new Living Memorials service.

You'll also receive sample promotional flyers which families can use to help make others aware of their loved one's Living Memorial page.

As an added promotional tool, links to your digital memorial pages and website can also be added to cemSearch.com, the nation's fastest growing database of cemetery records at no additional cost to you.
